Deadline for manuscript  
submissions:

**30 September 2020**

### Message from the Guest Editor

Dear Colleagues,

Today, no one doubts that fiber Bragg gratings have become the most used tool for measuring various physical parameters, the structural integrity of engineering systems, and biological activity of living systems. Classical approaches to measurements based on temperature and mechanical deformations and changes in the refractive index of the surrounding sensor environment are actively developing. One of the winning directions of these studies is the transition to microwave photonics measurement systems. The second promising direction is the development and creation of addressable FBGs.

This issue is dedicated, but not limited to:

- Modeling and simulation of FBGs;
- Fabrication and applications of FBGs;
- Multiparameter FBG sensors;
- Addressable and Nonsymmetrical FBGs;
- Sensors on chirped, tilted, etc. FBGs;
- High-speed optoelectronic interrogation methods;
- Microwave photonics interrogation methods;
- FBG sensors in dynamic and quasistatic measurements;
- FBGs in optical fibers of different classes;
- FBG sensors in DTS, DTSS, and DAS systems;
- FBG sensors in medicine and living systems monitoring;
- Biological FBG sensors;

## Editors-in-Chief

**Prof. Dr. Assefa M. Melesse**

**Prof. Dr. Alexander Star**

**Prof. Dr. Vittorio M.N. Passaro**

**Prof. Dr. Leonhard M. Reindl**

**Prof. Dr. Mehmet Rasit Yuce**

**Prof. Dr. Eduard Llobet**

**Dr. Guillermo Villanueva**

## Message from the Editorial Board

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), **Ei Compindex**, **Inspec (IET)** and **Scopus**.

**CiteScore** (2018 Scopus data): **3.72**; ranked 9/123 in 'Physics and Astronomy: Instrumentation' and 102/661 in 'Electrical and Electronic Engineering'.
